4/8/76--Quick note on things you probably know, but I'll say just to be sure:

1) CE 3120, pamphlet by Corliss Lamont, "The Crime Against Cuba" has the following stamped on next to last page: "FPCC, 544 CAMP ST., NEW ORLEANS, La." (26H783) Presumably this was found among Oswald's possessions?

2) I seem to recall having read in ONO that the WC printed only Martello's transcription of the paper found on Oswald during NO arrest (CE827). I can't find ref. in ONO. At any rate, the WC did print facsimile of original paper, both sides, with FBI translation--CE 1438, 22H848-49.

3) Had you noticed that the return address is blocked out on the sample of LHO literature from the Dumaine St. Wharf distribution? This appears at 22H807. However, this appears identical with the one shown in CE 2966-A. The paper seems to have been folded, with creases appearing almost like the design on British flag. The central crease is thicker than the criss-crossing ones. Also note holes punched atop CE 2966-A. The hole to the right of "S" on "HANDS" is partly visible in the CE 1412 copy. They are one and the same, so why block out the Magazine St. address and the initials dated 11/23/6 Or did someone substitute CE2966-A for what really belongs in 1412?
